

Refining **drug delivery** toward the
vascular tissue

CID's Amphilimus™ Formulation

CID's formulation unique features

Formulated Sirolimus with an Organic Acid

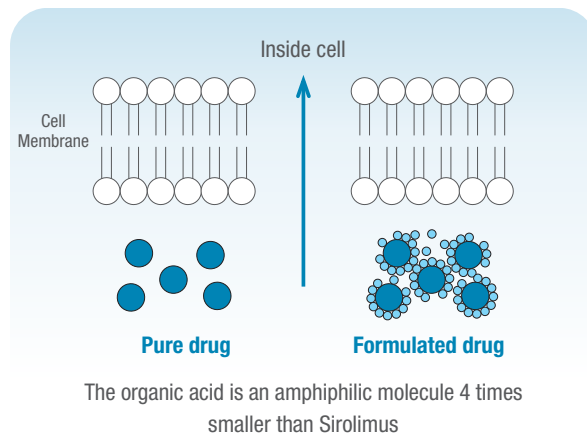

Sirolimus Properties

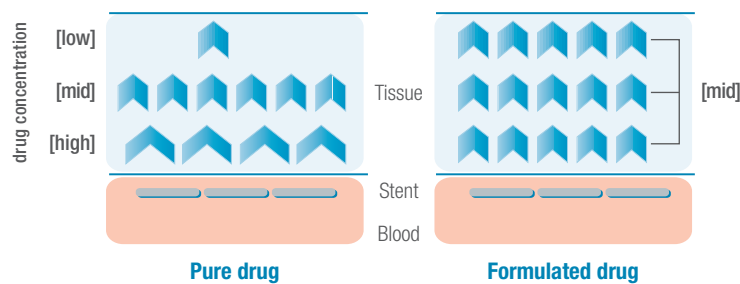

+

Carrier Contributions

- **Sustained drug elution** Prolonged drug kinetic release
- **Modulated drug bioavailability** Cell membrane is more permeable to small amphiphilic molecules

- **Raised homogeneous drug distribution** Optimized permeability allows a uniform action on the whole tissue

- **Enhanced drug stability** Extended product shelf life

The combined effects of formulated components contribute to maximize overall product safety and efficacy
