of Vascular Access Products*

A Great Introduction

Prelude®

SHEATH INTRODUCERS

The Prelude family of sheath introducers is a comprehensive product line offering excellent transitions, smooth insertion and more.

HEMOSTASIS VALVE - Minimizes blood leakage. Facilitates insertion and withdrawal of devices.

Prelude^{PRO}

SHEATH INTRODUCERS

Polypropylene (PRO) sheath tubing offers increased resilience and additional support during procedure.

COLOR-CODED HUBS - Match standard French sizing for easy identification.

SNAP FIT DILATOR - Eliminates slipping during insertion. Easy to grasp surface with an audible snap.

Prelude^{ACT}

ACT SHEATH INTRODUCERS

The Prelude ACT (Activated Clotting Time) sheaths allow easy blood draw from the side arm – with or without a catheter in place. These half size sheaths have the same great properties as the other Prelude sheaths.

LARGE INNER DIAMETER SHEATH TUBING - Kink resistant, flexible and radiopaque. Facilitates pressure readings, flush and aspirations.

ROTATING SUTURE RING - Rotates around device. Smooth surface. Large suture opening.

HOLSTER - Keeps all components secure, especially the guide wire. Components can be flushed while in the holster. All Prelude Sheaths are packaged in the holster (except Prelude Short Sheaths).

Prelude®

RADIAL (MINI ACCESS) SHEATH INTRODUCERS

Facilitates sheath placement via small needle (21g or 20g) and small guide wire (0.018"/0.46mm or 0.025"/0.64mm).

Product is packaged with needle, guide wire, sheath and dilator.

Excellent for radial, brachial and femoral use.

EXCELLENT TRANSITIONS - Facilitates smooth entry into patient and vessel. Resists kinking during insertion. Dilators are available with 0.018" (0.46mm) and 0.025" (0.64mm) tip tapers.

* .018" Guide wire is stainless steel with straight stainless steel flexible tip.

** .035" & .038" Guide wires are stainless steel; double ended (3mmJ and floppy).

Packaged 5 per box

RADIOPAQUE MARKER TIP

Improves visibility of sheath tip to clearly and easily identify where sheath is within fistula, graft or vessel. Excellent tip transitions to facilitate smooth insertion, even through tough grafts or skin.

LARGE BORE STOPCOCK & PINCH CLAMP

Allows for increased aspiration, flush and flow during procedures. Stopcock is removable. Clamp provides fluid delivery control through side arm.

SHEATH HUB WITH ANGLED

LARGE BORE SIDE ARM TUBING

Angle of hub combined with large inner lumen of tubing provides superior flow.

Finale[®]

RADIAL COMPRESSION

The Finale[®] provides non-occlusive compression and ensures patent hemostasis at the conclusion of a radial approach procedure.

Catalog Number

FCD100 10" (25.4cm) band length
FCD200 12" (30.5cm) band length

Packaged 10 per box

RADSTAT[®]

Provides controlled hemostasis and patient comfort with convenient adjustable, direct pressure on the puncture site.

Packaged 10 per box

MERIT **MAK**TM

MAK AND S-MAK MINI ACCESS KITS

*Excellent transition between dilator and introducer.
Dilator fits snugly into the introducer for smooth entry
into the vessel. Stiffened dilator (patent pending design)
provides additional support during placement through
scar tissue and/or difficult anatomy.*

*Kit configurations provide the necessary
components for quick access to the vessel.*
