LOCKING DRAINAGE
CATHETER

Designed for
Comfort & Accuracy

RESOLVE LOCKING DRAINAGE CATHETER

To prevent irritation of the surrounding tissues, the tip of the ReSolve Locking Drainage Catheter is positioned within the pigtail curve. Depth markers located on the catheter shaft aid accurate placement and act as a reference for correct positioning.

FEATURES AND BENEFITS

ACCURATE PLACEMENT

Depth markers aid in accurate placement and act as a reference for correct positioning.

ATRAUMATIC

Catheter tip positioned within pigtail curve to reduce tissue irritation.

EASE OF INSERTION

Tapered tip and hydrophilic coating facilitate a smooth introduction to reduce patient discomfort.

CATHETER SECURITY

The unique design makes it easy to engage the locking mechanism with one hand and is also tamper resistant. The low profile of the locking mechanism and hub are designed to provide patient comfort.

DRAINAGE EFFICIENCY

The large drainage holes maximise drainage while maintaining catheter patency.

HIGH VISIBILITY

Radiopaque platinum marker band incorporated into the catheter wall for visualising the most proximal drainage hole.

EASY IDENTIFICATION

Colour-coded catheter hubs and packaging make it easy to determine the French size for initial placements and catheter exchanges.
